Command	AINT

PURPOSE   Build integral of analyzer

PARAMETERS

AIN	Source analyzer
/DEST(AOUT)	Destination analyzer
/OUT(AOUT)	Alias for option /DEST

FUNCTION   Build the integral of the source analyzer. The content of any channel of the destination analyzer is the sum of the contents of all preceding channels, including the actual channel, of the source analyzer. If the destination analyzer does not exist, it is created by the command.

REMARKS   This command is the inverse of the ADIFF command.

EXAMPLE   AINT AIN / DEST(AOUT)
Determine the integral spectrum of analyzer AIN and store the result in the analyzer AOUT.
